01

Introduction

Bright TV analysis summarizes recent audience behavior and strategic priorities to drive sustainable growth.

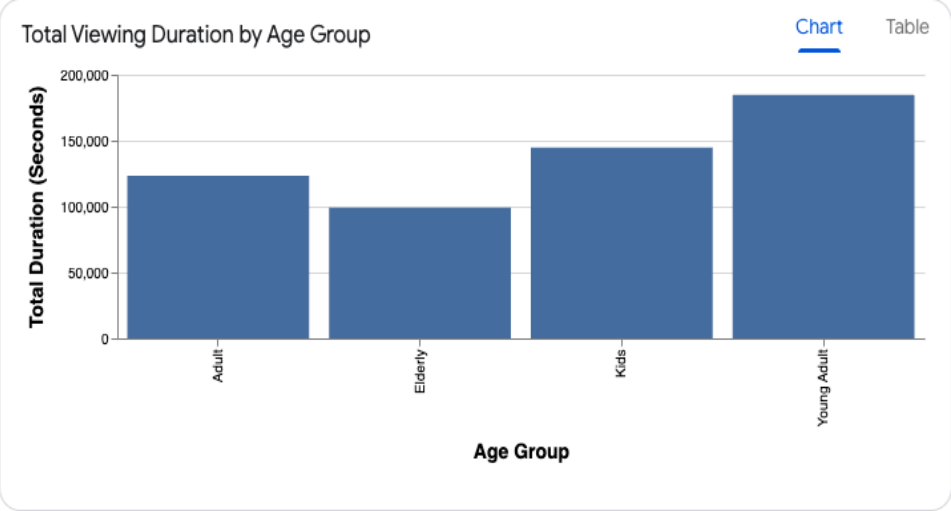
Key objectives: assess performance drivers, identify content opportunities, and recommend short-term actions to improve engagement and monetization.

02

Total Viewing Duration by Age Group

The following table and chart show the total viewing duration across different age groups. The duration has been converted to total seconds for easier comparison and visualization.

	Age_group	total_duration_seconds
1	Young Adult	184,626
2	Adult	123,222
3	Elderly	99,098
4	Kids	144,630



Insight:

Young Adults are the Most Engaged: The Young Adult group recorded the highest total viewing duration, reaching 184,626 seconds.

High Engagement from Kids: The Kids group followed closely as the second most active audience, with a total duration of 144,630 seconds.

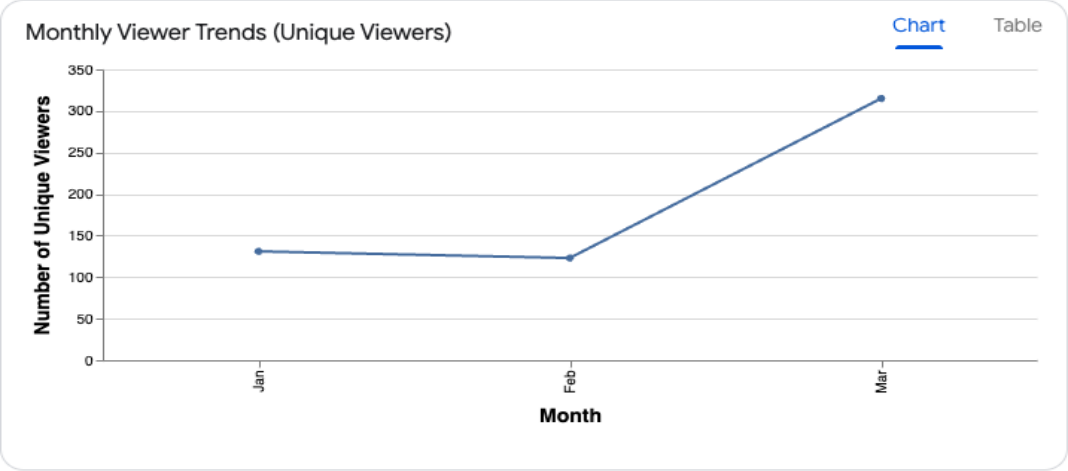
Lower Engagement in Older Segments: Both the Adult and Elderly groups showed lower overall engagement compared to Young Adults and Kids, with the Elderly group having the lowest total duration at 99,098 seconds.

03

Monthly Viewer Trends

The following data and chart represent the monthly trend of unique viewers and their total viewing duration. The analysis shows a significant surge in both viewership and engagement starting in March.

	Month_name	unique_viewers	total_duration_seconds
1	Jan	131	93,442
2	Feb	123	137,901
3	Mar	315	320,233



Insight:

•Significant Growth in March: There is a substantial increase in viewership during March, with the number of unique viewers growing from 123 in February to 315 in March (an increase of over 150%).

•Engagement Growth: Parallel to the viewer count, the total duration also spiked to 320,233 seconds in March, suggesting not only more people were watching but they were also watching for longer periods.

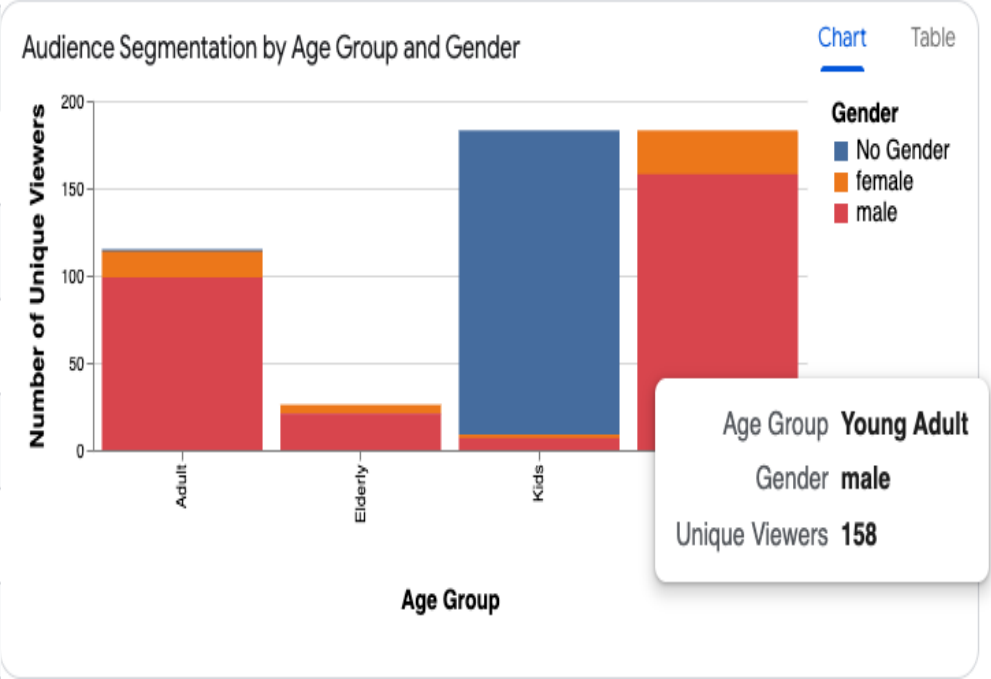
•Stable Start: The viewership remained relatively stable between January and February, with a slight dip in the number of unique viewers (from 131 to 123) despite an increase in total viewing duration.

04

Audience Segmentation by Age Group and Gender

The following data and chart represent the audience segmentation by age group and gender. This provides a clear picture of the demographic makeup of your viewers.

	Age_group	Gender	unique_viewers
1	Adult	No Gender	1
2	Adult	female	15
3	Adult	male	99
4	Elderly	female	5
5	Elderly	male	21
6	Kids	No Gender	174



Insights

High Presence of "No Gender" in Kids: The largest single segment consists of 174 unique viewers in the "Kids" age group with "No Gender" assigned. This likely reflects accounts where gender data for children was not captured or is intentionally kept private.

Young Adult Males lead identified segments: Among audiences with a specified gender, Young Adult males (158 viewers) are the most prominent group, followed by Adult males (99 viewers).

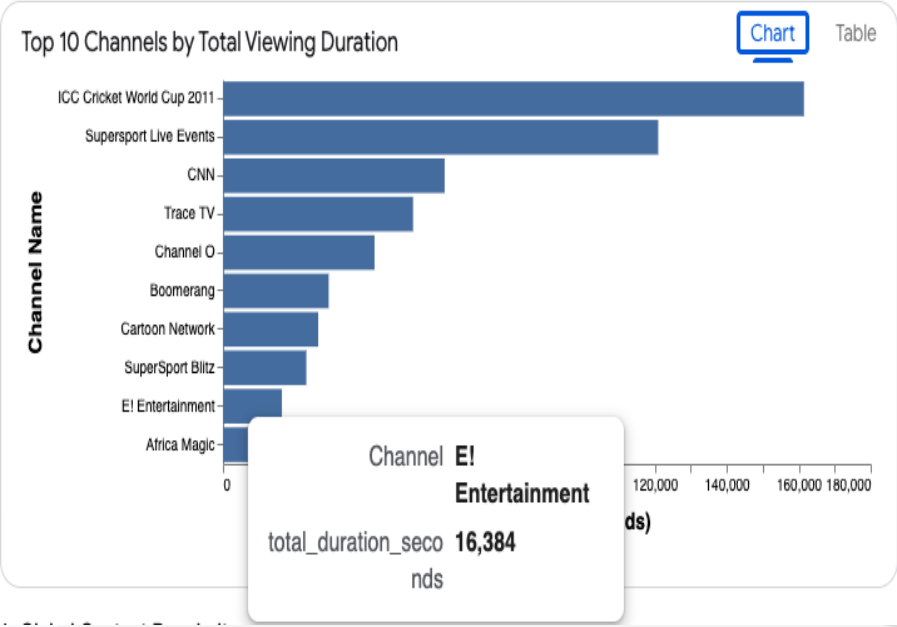
04

Top 10 Channels by Total Viewing Duration

This analysis presents a comprehensive overview of viewership trends, highlighting top-performing content, key audience demographics, regional reach, and weekly engagement patterns.

Top 10 Channels by Total Viewing Duration

	Channel Name	Total Duration (Seconds)
1	ICC Cricket World Cup 2011	161,458
2	Supersport Live Events	120,958
3	CNN	61,609
4	Trace TV	52,821
5	Channel O	42,120
6	Boomerang	29,372
7	Cartoon Network	26,460
8	SuperSport Blitz	23,165
9	E! Entertainment	16,384
10	Africa Magic	6,891



Insights:
The ICC Cricket World Cup 2011 and Supersport Live Events dominate the viewing charts, indicating a strong preference for live sports content among the general audience. CNN and Trace TV follow as the top non-sports channels.

05

Audience Reach by Province

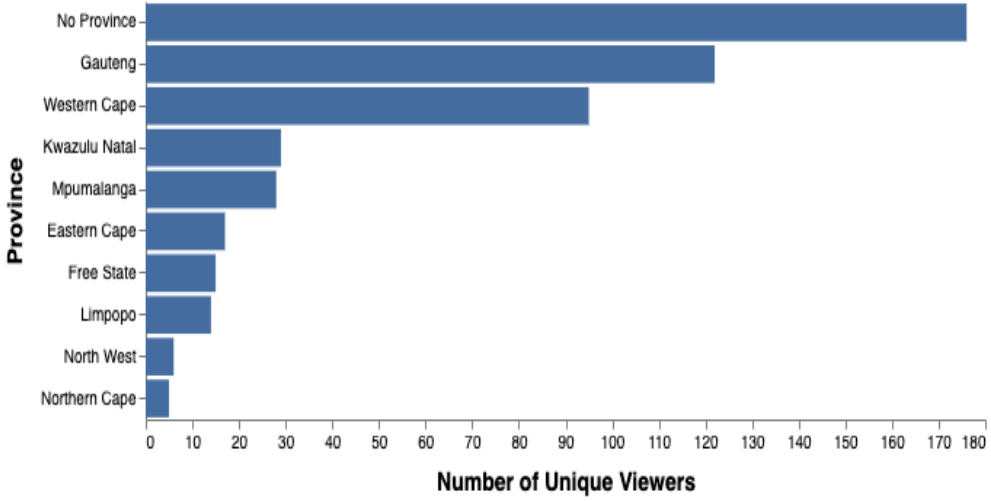
The ICC Cricket World Cup 2011 and Supersport Live Events dominate the viewing charts, indicating a strong preference for live sports content among the general audience. CNN and Trace TV follow as the top non-sports channels.

Audience Reach by Province (Unique Viewers)

	Number of Unique Viewers	Province
1	176	No Province
2	122	Gauteng
3	95	Western Cape
4	29	Kwazulu Natal
5	28	Mpumalanga
6	17	Eastern Cape

Audience Reach by Province (Unique Viewers)

Chart Table



Insight:
Gauteng and Western Cape are the primary hubs for unique viewers. This concentration in urban provinces highlights the core geographic market for broadcasters.

06

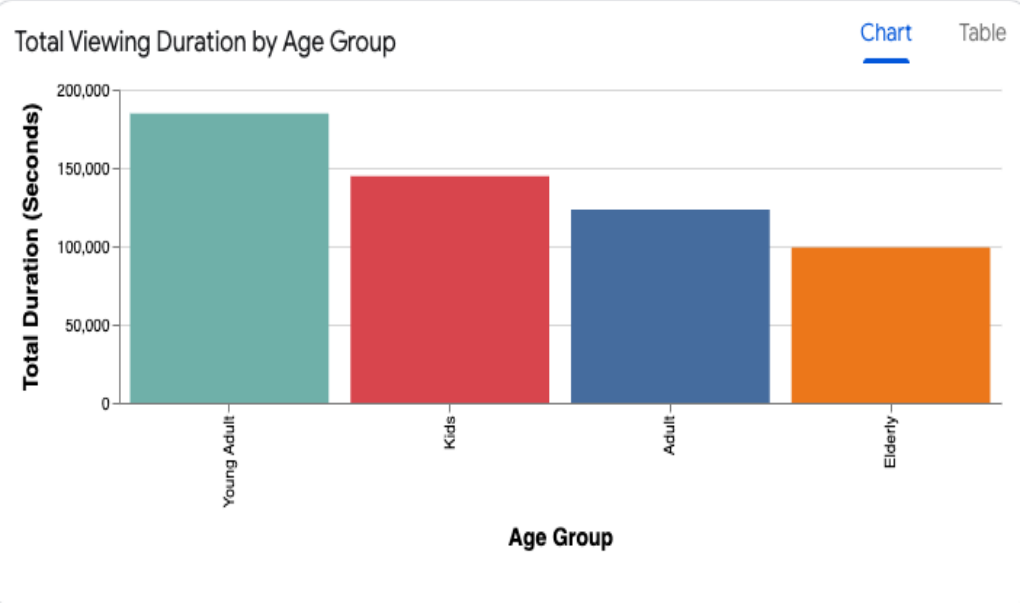
Total Viewing Duration by Age Group

The following table and chart show total viewing duration broken down by age group.

Total Viewing Duration by Age Group

	Age Group	Total Duration (Seconds)
1	Young Adult	184,626
2	Kids	144,630
3	Adult	123,222
4	Elderly	99,098

Kids



Insight:
Young Adults are the most engaged segment by total duration, followed closely by Kids. This demonstrates that while sports (likely driven by adults) are popular, youth-oriented programming and cartoons also command significant viewing time.

07

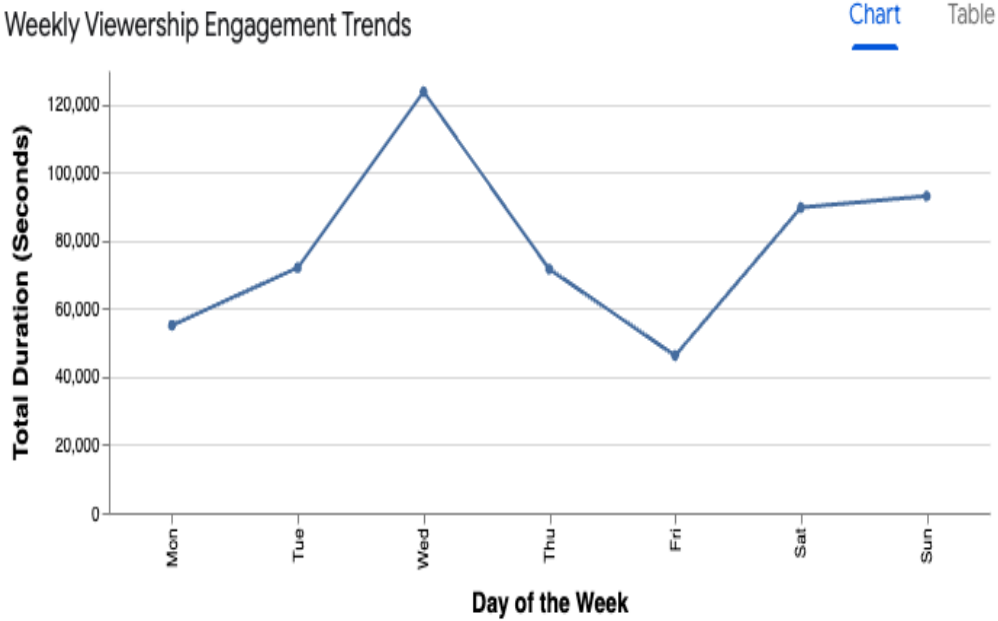
Weekly Viewership Engagement Trends

The following table and chart illustrate the engagement trends for each day of the week.

Weekly Viewership Engagement Trends

	Day of the Week	Total Duration (Seconds)
1	Mon	55,120
2	Tue	72,058
3	Wed	123,723
4	Thu	71,622
5	Fri	46,224
6	Sat	89,737

Wed



Insight:
Engagement peaks significantly on Wednesdays and remains high during the weekend (Saturday and Sunday). The midweek spike suggests an opportunity for high-impact programming or ad placement.

Top 5 Channels for Young Adults(by Engagement)

08

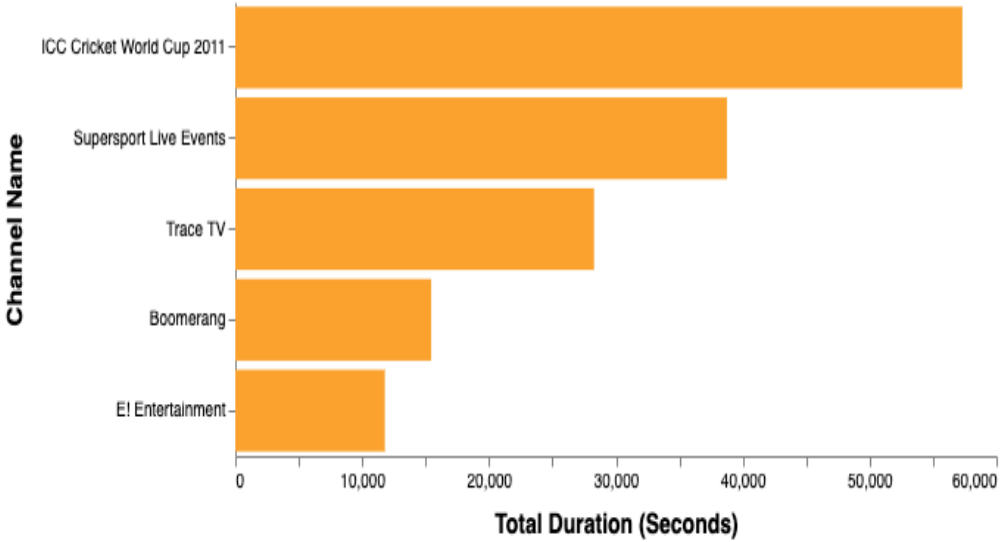
The following table and chart focus on the top 5 channels preferred by the "Young Adult" age group.

Top 5 Channels for Young Adults (by Engagement)

	Total Duration (Seconds)	Channel Name
1	57,314	ICC Cricket World Cup 2011
2	38,758	Supersport Live Events
3	28,281	Trace TV
4	15,442	Boomerang
5	11,790	E! Entertainment

Top 5 Channels for Young Adults (by Engagement)

Chart Table



Insight:
While sports remain popular with Young Adults, there is also a notable interest in music and entertainment via channels like Trace TV and E! Entertainment.

Conclusions

Viewership and Engagement Analysis

The analysis reveals a broadcasting landscape dominated by high-impact sports content and a rapidly growing audience base, particularly among younger demographics in urban hubs.

1. **Core Content Strategy: Sports vs. Entertainment**
Sports Supremacy: Live sporting events, specifically the ICC Cricket World Cup 2011 and Supersport Live Events are the primary drivers of viewing duration across all demographics.
Diversified Entertainment: While sports lead, there is a strong secondary market for music (Trace TV, Channel O) and international news (CNN), providing consistent alternative engagement.

2. **Key Audience Demographics**
The Youth Engine: Young Adults and Kids represent the most engaged segments. Young Adult males are the most active identified group, while the Kids segment shows high volume, often with unassigned gender data.
Gender Gap: There is a significant gender imbalance in identified segments, with male viewers substantially outnumbering females in Adult and Young Adult categories.

3. **Temporal and Regional Trends**
The "March Surge": Viewership saw a massive 150% increase unique viewers in March compared to February, signaling a maj seasonal or event-driven growth phase.
Peak Viewing Windows: Engagement is not uniform; it peaks unexpectedly on Wednesdays and remains consistently high during Saturdays and Sundays.
Urban Concentration: Gauteng and the Western Cape are the undisputed geographic strongholds, containing the majority of th unique viewer base.

Strategic Recommendations

Inventory Optimization: Schedule premium advertising and high-impact content on Wednesdays and Weekends to maximize reach.
Targeted Programming: Continue investing in sports rights to anchor the broad audience but develop niche strategies for the Young Adult demographic by leveraging music and lifestyle content.
Regional Focus: Prioritize marketing spend and regional content localized to Gauteng and Western Cape to solidify the core market.
Data Enhancement: Improve gender data collection for the Kids segment to better tailor educational or youth-oriented programming and advertisements.
